

Proposed revisions and comments from ULTCB Work Group:

Recommendation – Financial Incentive:

- ◇ Build incentives into public payment systems for all provider types, including quality and other measures such as serving hard-to-serve areas and populations.

*Group agrees this recommendation should be returned to subcommittee for clarification. Concerns noted include;*

*Language is vague*

*Statement needs “outcome orientation”*

*Define “incentives”*

Recommendation – Regulation:

- ◇ Regulatory data, where available, should be part of quality measurement.

*Group agrees to delete above recommendation*

- ◇ Identify provider types that are not regulated and explore whether licensing and periodic review would be appropriate as a means of demonstrating a minimum level of regulatory compliance. ~~means of developing quality standard.~~
